

FIRE WALL GYPSUMLINE

GYPSUM BOARD FW - GL - 12 mm

■ DESCRIPTION

GYPSEMLINE FIREWALL gypsum board 12 mm –GLFW TE 12mm - is a factory produced 1.2m wide gypsum plasterboard offering its high quality property of non-combustibility and mechanical stability that makes suitable for screw-fastening to dry wall structures in steel as well as wooden sections. The GLFW TE 12 gypsum plasterboard is encased in a heavy natural-finish pink colored liner paper on the face side and a strong brown colored liner paper on the back side.

The face paper is folded around the tapered long edges (on the face side only) to reinforce and protect the core and cross ends are square cut. The taper allows for concealing of joints by an appropriate joint treatment.

■ HEALTH & SAFETY

There is no significant health hazard when using and fixing Gypsemline (GL) Gypsum Plasterboard. It is free from Asbestos & Strontium Sulphide.

■ ADVANTAGES

- Light in weight.
- Easy to install
- Cost Effective
- Environmental Friendly
- Ready to take a wide variety of decorative finishes
- Suitable for internal construction
