

GYPSEMNA FLAT STRAP

METAL PROFILES

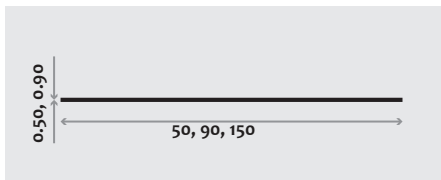

DESCRIPTION

Gypsemna Flat Strap is the horizontal member of the Ceiling / partition metal framework. Applicable for Ceiling, Partition & Liner System.

BASIC USES

This is used primarily to back up the horizontal cut joints and also for lateral bracing. This also includes to provide support for seismic cross bracing and as backing strip for the fixation of Access Panel to the Ceiling / Partition system.

ADVANTAGES

- Consistently high quality.

TECHNICAL DATA

PHYSICAL PROPERTIES

Coating	AZ150 Zinc- Aluminium Coating / Z275 Zinc Coating
Standard Compliance	ASTM A792 / ASTM A653
Material	Cold roll - formed from hot - dipped galvanized steel
Grade	G300
Min Yield Strength	300 mpa
Min Tensile strength	340 mpa
Available Thicknesses (in mm)	0.50 and 0.90
Width (in mm)	50, 90 and 150
Length (in mm)	3000
